General Report Comments: Upon arrival, I was met with the owner. I observed the dog being on a runner. The runner is constructed with a thick rope with an approximate length of 5m and an attaching 3m light chain. They made a makeshift collar where they used the same thick rope and run it through a hosepipe. The dog has more roaming space and also appeared happier.

The only concern left is that the owner must obtain a swivel to prevent the chain from twirling. The owner advised that she did place a swivel onto the chain, but that the swivel was small and broke. She will try to find a bigger swivel. Unfortunately I did not have any big swivels with me to assist her with today.

I will follow up next week to see that the swivel has been attached as well.
