General Report Comments: I saw this black and tan terrier x male on a short chain tied to a car without a collar or shelter. I stopped and the owner Marius Booysen came out. I asked Marius why the dog is chained and why does the dog don't have any shelter. Marius told me that the dog is chained because the dog can jump over the wall and causes trouble in the street, attacking people. The shelter he says his busy with. The dog has water available and his body condition is acceptable. I issued warning W5580 to put the dog on a running chain provided with a collar and to also provide the dog with adequate shelter against the natural elements. Will follow up.
