General Report Comments: I did a recheck today and I was with inspector carina and the dog wasn't there it was in the street and they sent the kids to fetch the dog. We saw the dog and he had one puncher wound in the side of the neck and the jaw which appears to be an abscess already and the lady who welcomed us to the property said is the mother in law of the owner of the dog told us that the dog wasn't taken to the vet and the lady who drives around the location by the name of dot skelly advised them to use salt water and this was not enough because the wound appears to be pussy. We issued the owner with the warning to provide adequate veterinary treatment within 24 hours.
