General Report Comments: PROACTIVE

Upon arrival, I was met with the owner. I observed 2x dogs chained on the property.

Dog 1: Xbreed - Chained in front of the house on a 360 degree swivel. The chain is approximately 4m long. The dog has a kennel and drinking water available. The dog had choke chain as a collar.

Dog 2: Pitbull - Kept on a static chain at the back of the property, on the right hand side. The chain is also approximately 4m long. The dog has a chain running thru a hosepipe as a collar.

I gave collars and swivels for both dogs and advised the owner that they must obtain suitable collars in the interim, as I only loaned them these. She understood and said she will do so.

I educated with regards to running chains, but the owner advised that they are not able to install this asap, as her husband is away from work. I asked if she will then at least be able to extend the chains with a minimum of 2m, to which she said she will definitely do, as she will be able to do this on her own.

I issued a warning stating:

1. Either place the dogs on a runner or extend their current chains by 2m minimum;
2. Provide the dogs with strong durable collars

9 days was granted, as the owner advised that she needs a bit more time to source the materials.
