General Report Comments: PROACTIVE

Upon arrival, no one appeared to be here as there was no response to my presence.

I observed about 10x pigs of various ages and sizes in enclosures. The enclosures are well build and provides the pigs with adequate protection against the weather elements. The pig enclosures where however full of plastic and it appears as if when the owner give food the dont remove the plastic.

Warning issued:

1. Remove all plastic from enclosures and hygienically maintain the enclosures.

Will follow up in 7 days
