General Report Comments: Upon arrival, I saw the dog was free roaming on the property. A young man called the dog and the dog went to him. This dog is very aggressive and when I got out my bakkie to approach the area where the cage was the dog charged at me. I saw that the cage has been broken down and that the runner is no fully installed. The young man advised that the collar they had on the dog was to big and that he got loose, hence he is now free roaming, but he can control the dog.

He advised that his father is looking for a better fitting collar before they put him on the runner.

The dog is in good condition with no veterinary or health concerns observed.

I will follow up next week to see if the dog is on the runner.

The dog has access to a large wooden kennel which provides adequate protection against the weather elements, and has water.
