General Report Comments: Upon arrival, I was met and granted access to the property by the owner's wife, Muriel.

I saw the dog is on his swivel rope attached to his kennel. The rope is approximately 6m long and the dog had space to roam.

Muriel advised that the dog ripped the pens that is in the ground of the runner out. Her husband is currently in Mosselbay and will only be able to get longer pens and cement them in about 2 weeks, when he returns. He also bought a pully with a swivel to help the runner run smoothly.

Eventhough the dog has space to roam, it will be better for him to be on a runner, as he will have more space the .

I will return after 2 weeks, as the dog will then be on the runner.

The runner is still in the ground, I lifted the runner a bit and the 1 pen this come out, as the pens are short and the ground is very soft.
