General Report Comments: Upon arrival, I was met and granted access to the property by the owner.

I shared the nature of the complaint with him and he advised that the incident occurred about 2 weeks ago and that he has been medicating the dog himself. I asked to see the dog and he took me to the back yard where the dog is kept.

The wound has healed very well, there is no swelling on the leg, the dog is putting full pressure on the leg and walked with comfort. The 2 puncture wounds have also healed well, no sign of infection.

The owner advised that he is struggling with the dog's mouth and asked if I would have a look. I assessed the dog's mouth and a very bad smell came from the dog's mouth, the dog's teeth appeared to be very dirty, and I suspect the dog might need some teeth extractions.

I advised the owner that the dog will have to be assessed by a veterinarian and he agreed.

I issued a warning stating:

1. Have the dog assessed by a veterinarian as I suspect the dog might have dental concerns.

7 days granted, as the owner advised that he will have money for this by next week.

The dog did not appear to be in discomfort, and was also eating food and drinking water with ease.
