General Report Comments: Upon arrival, I entered the property as the property does not have a gate. I saw the door where the owner resides is open and I went to knock on the door. A young boy approached from inside. I asked if his father is around and he said no, his father was here briefly this morning then left again. I asked if he has a number for his father and he gave me a different number than what his sister gave yesterday.

I called the owner and he answered, I asked if he received the warning I issued yesterday, he advised that he received it this morning when he was home briefly.

I advised him the severity of the injury and offered that he surrender the dog. He did not want to surrender the dog and advised that he will take the dog for treatment this afternoon, or first thing tomorrow morning. I advised that I will issue a final warning for this to be done, and he agreed.

I issued a final warning stating that the dog must be taken for veterinary treatment before 11h00 tomorrow morning.

I gave the warning to the son who advised that he will give it to his father.
