General Report Comments: Upon arrival, we were met and granted access to the property by the owner.

I observed 2x Capuchin Monkeys on the owner's shoulders. They are still very young. We were taken into the house where we could see the food they are given, they are fed a large variety of vegetables, fruits, proteins, biscuits, porridge etc. The food was fresh and kept in a hygienically maintained environment. The monekys are not caged, they are free roaming inside the house at all times and with the owner.

They did not display any behavioral or stereotypical behavioral concerns. The monekys were calm and interacted well with the owner.

The monkeys are clean, had no bad smell, their coats were shiny.

The owner has a permit from CN, it must just be updated as she moved properties.

No APA contraventions observed.
