General Report Comments: Upon arrival, I was met by Heather, who stated she is a family friend that looks after the owner's granddaughter during the day.

I remeber Trainee Insp Jeff Mathabela discussed this case with me and that we are of the opinion that the dog is to be dewormed and fed 2x day with good food. He mentioned earlier this morning to me that the owner messaged him to advise she did not have time to buy the deworming tablet yet.

I saw the dog and the dog is bright, alert and responsive. The dog is underweight with a BCS of 1.5/5.

I also looked at the photos initially taken and the dog has not lost more weight since then, indicating that this might just be a case of internal parasites, as I checked the dogs for external parasites and the dog was free thereof.

I issued a warning stating:

1. The dog must be dewormed by Monday
2. The dog must be fed 2x day with good and nutritional food.
