General Report Comments: Upon arrival, I was met and granted access to the property by the owner.

The dog kept in the front has been placed on a runner, but the runner is very loose, making the runner not working effectively. The runner is approximately 7m long with an attaching 2.5m light chain with a swivel. The dog has access to shelter and water. The owner has a new thick material collar for the dog, but has to make new holes, he will do this tonight, as the makeshift collar on the dog currently is too big and the dog keeps loosening himself. The dog has a wooden kennel which provides adequate protection against the weather elements.

The dog kept at the back has been placed on a runner as well, his runner is about 9m long with an attaching 2m light chain with swivels attached to his material collard. The dog has a wooden kennel which provides adequate protection against the weather elements.

The owner will tighten the cable of the dog kept in the front to ensure the runner works well.

I will come by in 2 weeks time to ensure the dogs are still on their runners.

Owner complied with the warning initially issued.
