VETERINARY PROBLEMS / HEALTH CO	Yes ***	Possible tickbite fever.
CONFINEMENT OF ANIMALS	Static Chain - inadequate length **	Unknown

General Report Comments: I was accompanied by Yvette Coetzee who is the manager on the farm . Yvette took me to the house where the underweight dog on a short chain is,upon arrival I saw 1x black terrier x male o a short static chain with a collar. The dog is also underweight and has a body score of 2/5,the dog also have fly strike wounds on his ears. Water and shelter is available. This is now the second dog that the Spca has removed from this house in such conditions. Yvette got hold of the owner and he said that the Spca can take the dog. I issued a warning W5537 stating that if the Spca found any animal in this condition on this property agai that further steps will be taken. Yvette the manager surrendered the dog with the owners permission. Refer to admission D9043. Yvette then took me to another house where there is puppies and the 1 x puppy has already died and Yvette is afraid that it is Parvo. I spoke to the owner and explained to her that if what the puppy that died was Parvo that the 2x puppies still in her care will also die. The decided to surrender the puppies,refer to admissions D9044,D9045. Nfa until further notice.
