General Report Comments: Upon arrival, I was met with Mrs Kleinsmidt, the mother of Christien (owner of the cats).

She granted me access to the house and took me to her daughter's room where I saw 2 batches of kittens. The kittens are still drinking from their mothers. The kittens appear to be in good condition with no veterinary or health concerns observed.

All the cats are free roaming inside the house and outside. There is plenty of Catmor cat food and a litter tray inside the house and outside is sand.

I saw 3 kittens that appear to have anul problems, seems to be runny stomach but it has made a type of a rash.

The mother advised that her daughter is working today and tomorrow and that she is off this weekend.

I issued a warning:

1. Take the kittens for veterinary treatment within by Monday at 11 h00.
2. She is welcome to surrender some of the cats
3. To contact me to discuss these concerns
