General Report Comments: I was met by the owner Roy Love who went to show me the female dog with the puppies. I saw 1x brown terrier x female and 5x puppies. The brown terrier x is loose and the puppies was lying inside the kennel. Water, food and shelter was observed. The female is a bit underweight because the puppies is still feeding on her, but Roy told me that he feeds her twice a day. The body condition of the female is acceptable for a dog that just had puppies, attached is pictures of the female terrier x. The puppies are all healthy and sick puppies was observed. I will do a recheck to monitor the body condition of the female terrier x. Will follow up.
