General Report Comments: Upon arrival, I was met and granted access to the property by the owner, Retta. I asked if she received the warning I left on her gate yesterday and she confirmed that she did.

We walked to the back of the property and I saw that the dog is still on the chain , but the chain appeared to be extended with another meter. The dog now has a material collar fitted. Retta advised that they tried to let the dog free roam inside the property, but the dog keeps escaping by either climbing over the fence or digging holes underneath, hence they reverted back to chaining the dog.

Retta advised that she is currently alone and would need assistance to install a runner. I asked if she will be able to install a runner within the following 7 days and Retta advised that she think she can and will try her best. I also advised her that if she feel at any moment that she cant look after the dog anymore or cant provide the dog with his basic needs that she is welcome to surrender the dog to the SPCA. She understood and said that she will first try to install the runner.

I granted Retta 7 days to install the runner, I did not issue Retta with another warning as I just extended the current warning's time frame verbally.

The dog currently has access to a clean living area, water and andequate protection against the weather elements.
