General Report Comments: The owner of the sheep was not present when I did my inspection. Rasta who also stays on the farm gave me access and took me to the sheep. I saw +-14 merino breed sheep in a camp. There was no water or food available for the sheep and 1x of the sheep looked sick. All the sheep needs to be shaved because the wool is so matted that with some sheep the dry feces is sticking to the wool. I issued warning W6005 to get the 1x sheep to a vet within 72 hours and to shave the sheep withi 5x days. I also noted on my warning that the sheep should have fresh water and food available at all times. Will follow up.
