General Report Comments: PROACTIVE

Upon arrival, I was met and granted access to the property by the owner.

I observed 1x dog kept on a long light chain. The dog has a raw chain as a collar, no swivel on the chain causing the chain to twirl. The chain is approximately 9m long. The dog is slightly underweight, has ticks and has small sore on his sit bones. The dog was apparently last dewormed more than a year ago.

The owner advises that Dot comes to him and helps him, he will ask her for deworming and dip. He will buy a collar tomorrow, and a swivel.

The dog is not in such a condition that veterinary treatment is required at this stage, I believe with deworming and dipping the dog will gain weight.

3 days granted
