General Report Comments: Upon arrival no one appeared to be home as there was no response to my presence. I observed 1x dog kept on a long light chain. The chain is approximately 13m long. And the dog has 270 degree movement space, granting the dog in total with approximately 26m roaming space. I saw the dog had a hosepipe collar, but I cannot confirm if a chain runs through as the dog is extremely aggressive. I saw 2 large wooden kennels which the dog has access to and a large water bucket. The living area is clean. I left a warning: The dogs appears to be underweight and must be assess by a veterinarian. Time granted till Monday at 11. As I was about to leave, an unidentified male approached me from the road as he just parked his car in front of the house. I asked if he was the owner of the dog but he advised that he is a friend of the owner and asked what is wrong. I advised that I am concerned about the dog's weight as he appears to be underweight and emaciated and showed him where I left the warning for the owner's attention. The man advised that he will inform the owner ad show him the warning.
