| CONFINEMENT OF ANIMALS          | Caged - adequate space To prevent the spread of disease |

General Report Comments: I did not observe any pig or any animal that looked sick at the small holding.I met Mr Marius from the DepaDepartment of Agriculture and he informed me that there was 89 pigs left and the Department of Agriculture is doing inspections once every week to determine if the African Swine Flue virus is still in the area. He informed me that no pigs are allowed to move in or out of Malmesbury up until the Department of Agriculture is sure that the virus is no longer in the area .
