General Report Comments: I observed an adult male Terrier x white + black dog that is underweight. The dog's name is Thunder and he is neutered. Thunder has a skin condition that is in it's early stages. The living environment is dirty as there is old dog feces on the ground. I did observe water, food and shelter. I issued a 24hour warning for Madele to clean the yard and 7days seek vet treatment for the emerging skin condition and to improve the dog's body condition. Madele came out after i had already issued the warning and i was about to leave that is why on the warning i mention that i would like to see dog food on my next visit.

**ACTIONS**

Warning Issued W6923

**REPORT OUTCOMES**

Follow-up inspection to be conducted 2025-10-02
