General Report Comments: Mrs. Lewis granted me access to the property, where I observed 1x brown pitbull female. I could see that the female is starting to go on heat again because there is blood spots drips from her vagina. On her belly she has like a bruise but it's not like a open wounds. Mrs. Lewis son says it's because she keeps on jumping over the fence and that is where it got bruised. Water and shelter is available and the dogs body condition is acceptable. Living area is also clean. I spoke to Margie from CARE St. Helena Bay about sterilization for this dog and she took the owners details. Will follow up.
