General Report Comments: The Padstal is closed on Mondays and Tuesdays so the gates were locked but Mr Van Rooyen was at the Padstal feeding the animals. There is a water source that fills itself automatically and there was oathay on the ground and dry grass also. The complainant told me that he was standing at the gate when he saw the donkey and I advised him that at the far end of the camp that is where the water source is. Mr Van Rooyen could not let me in as there was no people (owners) at that time. The donkey is in a very good body condition and there is no contravention of the Animal Protection Act.
