Mange and underweight  
Mange and underweight

General Report Comments: We arrived and the caretaker of the plot Mr March came out. He told me that he is looking after the plot. I saw a black and brown german shepherd male dog on the property that was in a very bad condition. The dog's name is Danger. There was not water or food available and he could not show me dog food. The dog had bad mange and was very underweight. I asked Mr March why the dog looks like that and he told me that he is not the owner of the dog he is just looking after the property for the owner and he just started there a few weeks ago and the dog looked like that when he got there. I explained to him that he is seen as the owner of the dog if he is living on the property with the dog and looking after the property. I explained to him that this dog cannot be left like this in this condition and gave a warning for the dog to be adhered to within 12 hours. Mr March then phoned the owner of the plot in my presence and explained to him what was going on and that the dog must be taken to the vet and the owner said that Mr March must sign the dog over to the SPCA. I humanely euthanased the dog at the SWARTLAND SPCA
