CONFINEMENT OF ANIMALS	Free roaming - property not adequ	

General Report Comments: I saw this brown pitbull x female roaming in Venus street,the dog appeared to be underweight, upon closer inspection my suspicions wa confirmed,and the dog is actually underweight. I asked around and some lady pointed me to the house where the dog belongs. I went to the house and a lady came out. She introduced herself as Ms.Renay Papier and confirmed that she is the owner of the dog in question. I asked Renay if they have food for the dog because she is so underweight and one can clearly see her ribcage. Ms. Papier told me that they do have food for the dog but she eats and eats but does not gain any weight. I explained to Ms. Papier that is might be worms and asked her when last have they dewormed the dog and she replied by saying she does not know. I also told her that it can also be tickbite fever and the best thing for the dog would be to get her to a vet. I issued warning W5281 to provide the pitbull x female with the necessary welfare requirements to uplift her living conditions. Will follow up.

ACTIONS

Warning Issued W5281
