CHECKLISTS

General Report Comments: Waylene granted me access to the property where I observed 1x Boerboel x puppy with a blue eye. According to Waylene the puppies skin condition is much better then before and that the owner is treating the skin condition with a oil that he got from someone. I asked Waylene where the female dog is and she told me that they just got up one morning and the dog was gone. I looked on the property but there were no adult female dog. To me it looks like the puppies hair is starting to grow back, and I could see that he had a skin problem. I will do a recheck within 2xweeks to see how the puppy is doing.
