General Report Comments: The dog named Lisa is running freely inside the property. Leesche who is the owner of the dog informed me that her neighbours were complaining that the dog was backing none stop and she bought the focuspet anti backing no shock collar. The collar is not too tight as i could put my palm between the collar and the dog's neck. The collar is battery operated and whenever the dog backs it produces a beeping sound which deters the dog from backing. The dog's body condition is fair and acceptable. Water and shelter obsevered. Leesche was so upset and she removed the collar and she informed me that if the dog makes noise she doesn't want anyone to complain. There is no walfare concern as the collar does not shock the dog and is not too tight
