General Report Comments: Upon arrival I was granted access to the property by Mrs. Salomie Pieters who is the owner. On the left side of the property I saw 1x adult German Shepherd male called KC,in a enclosure. I went to the enclosure and measure it. The enclosure is 8x meters long and 4x meters wide. Inside the enclosure there is water and shelter. There were a few feces lying but I could see it's fresh feces and not old feces. The enclosure is about 1.8 meters in height with shade cloth on top so that KC can't jump over the fence. While standing there I noticed how high KC can jump and if not for the shade cloth on top he can easily jump over the fence of the enclosure. KC's body condition is also acceptable. I asked Mrs. Pieters why they keep KC inside the enclosure and she said that they only keep him there when they are not at home,because he can jump over the fence in the front,so I asked Mrs. Pieters but why is he now inside the enclosure whilst you are here and Mrs. Pieters took me to the other side of the enclosure where there is a gate and opened the gate,KC ran out straight to the front yard and wanted to jump but Mrs. Pieters called him with some treats. That's the reason why we can't let KC out without supervision Mrs. Pieters replied. The enclosure is big enough for KC to move around . I don't see any welfare issues. Will discuss the case with my manager.
