General Report Comments: Upon arrival at the property, I was granted full access to conduct an unannounced inspection by Ms. Wadsworth. The owner, Chanelle Boshoff, was not present at the time of the visit and had not been informed in advance of the inspection.

There are approximately 30 mixed-breed dogs on the premises. All dogs are housed indoors and each has access to its own bed or sleeping area. There is a lot of food and water available throughout the property. All animals were observed to be in good physical condition, displaying no signs of neglect or illness.

Sterilisation has been carried out for all dogs on the premises. I verified that the male dogs were neutered and felt the female dogs, confirming surgical site scarring consistent with spaying procedures.

The property was clean, well-maintained, and free of hazards. There were no signs of injury among the dogs—no bite marks, open wounds, or limping was observed. This suggests that the dogs are not engaging in aggressive behaviour or fighting.

There are no welfare concerns at this facility. No contraventions of the Animal Protection Act (APA) were identified during the inspection.

We will monitor this facility.
