Inspector:	MPHO BALOYI

Type:	GENERAL
Follow-Up Date:	
Comments:	On my arrival in Moorreesburg BKB saleyard/auction, I observed goats, sheeps and cattle placed in different kraals species to species single groups , each kraals had enough numbers of group that has space for the animals to turn around and had also adequate water with suitable containers or water bowls. All animals appeared physically looking good in condition with no veterinary problems or health concerns observed. Animals were handled humanely during offloading andloading , transportations were suitable and adequate with grading inside. The Spca will keep doing routine inspection.
