General Report Comments: On my arrival, I was welcomed by Mr Gino Scholtz the owner of the dogs, I observed 5 puppies of 2 months old all appeared physically looking fair in condition, and I observed a female brown/white pitbul 5 years old named Nala of which Nala appeared physically looking thin in condition and Nala also had an open wound around her entire neck. I also observed a brown male Africanis 3 years old named Coco, he also appeared physically conditionally looking thin in condition. I educated the owner about sterilization and to try feed Nala separate when feeding, and also feed Coco separate same to the puppies must be fed separately, and Nala at least needs to be fed 3 times daily because the puppies are still suckling from her. I issued Mr Gino Scholtz with a notice to comply. Refer attached.
