General Report Comments: On my arrival, I was welcomed by Mrs Grace Voster, I observed a female 6 years black Labrador cross dog named Kalissi, she had E-collar around her neck, it's been since last year 2025 around August she still have E-collar around her neck, according to Mrs Grace, she said the dog was suffering from mites everytime it bites its back until it injures itself, she took it to vet for vet treatment and they applied some medication they got from the vet but it couldn't help much the dog was still biting it's back, until the doctor told them to keep the E-collar as it will be the best for Kalissi not to injure herself.
The dog appeared physically looking good in condition.
Mrs Grace also said they sometimes remove the E-collar for short time when they bath her(Kalissi).
