General Report Comments: James was at home and he informed me that he doesn't have the keys for the gate. I asked him to bring a ladder which I then used to climb over the vibrecrate. I observed one adult dog named Brock and two puppies. James informed me that the puppies are three but we looked every where for the third puppy but we couldn't find it. The body condition of the adult dog and the brown puppy is fair and acceptable. The black + brown puppy has fleas. I issued a warning advising Mr James to seek treatment for the external parasites on the black + brown puppy within 48hours
