General Report Comments: There was no people at this property and I had to observe from the neighbour's property. I observed three adult boerboel dogs. The female dog has puppies which I couldn't figure how many they are but I could see four puppies. The female boerboel and the male brown boerboel are thin. The blavk and brown male boerboel's body condition is fair and acceptable. I observed water and shelter. The puppies are lying on the ground despite the availability of a dog kennel which is a concern especially with this rainy days. I issued a warning advising the owner to:
(1)to provide adequate food for the adult female boerboel and the female boerboel
(2)provide a warm environment for the puppies
