Comments:	The pin location provided by the complainant took me to an address where the people don't have any animals. There were no picture attached to show to Abraham who is the owner of the address where the pin location guided me. I contacted the complainant but her phone went to voicemail,I asked around but nobody seems to know anything about the dog in question,I also did not have a name to go on. On my way home the complainant Tracy contacted me,I told her that her GPS coordinates took me to a different address,she said that she will go through her phone again and see if she can find the right pin location. Just as I arrived home she send me another round location. Will follow up.
