General Report Comments: There were no people at home. I saw 2x Collie x dogs on the property, both males. The 1x dog has mange and has lost a lot of hair on his chest and back. The other male dog is in acceptable condition. I could see that both dogs are neutered. The one dog appears to be aggressive and the dog with the mange is very active but not aggressive. Water and shelter was observed inside the yard for the dogs. I issued warning W6370 for the owner to provide the dog with adequate treatment to treat the mange. Will follow up.
