General Report Comments: The dog named Devil is an adult brown male Pitbul dog. He is not nuetered. Devil is underweight and covered with external parasites. He is on a short static chain with a collar around his neck. I observed quite a few walfare concerns which I addresed with Angelo .
(1) the dog is thin and the body condition needs to improve meaning the owner must provide adequate food.
(2)the dog must be removed from the short chain
(3) the owner must seek treatment for the external parasites on the dog named Devil
