General Report Comments: There are two juvenile female dogs on this property and both are not sterilized as they are too young to be sterilized. Both dogs are underweight and their body condition need to improve. They are both running freely inside the property. I observed fresh drinking water. There is no adequate shelter available for both dogs as they are using two plastic crates on each side and a wooden plank on top. Wendy informed me that both dogs are only allowed to sleep inside the house at night . I issued a warning advising Wendy to:
(1)provide adequate food for both dogs
(2)provide adequate shelter for both dogs
