General Report Comments: While doing door to door I came across this black and tan terrier x female with mange,I asked the kids in the street who the dog belongs to and they showed me to the house. I stopped in front of the house and a lady came out,she introduced herself as Mrs. Arendse the owner of the dog. I asked Mrs. Arendse why the dog is in such condition and she replied by saying it's because the dog is always roaming around,I educated her that its because she did not treat the dog for external parasites that's the reason why the dog is in such condition. I asked her if she can afford treatment for the mange and she said no that I should rather take the dog called Nala. No other animals on the property. Refer to admission E1310. NFA until further notice.
