The Schedules dashboard displays the inspector's schedules. In order to close a Schedule item, you have to add a note and/or report for each. Take note of the Description field. This field will inform the inspector what is outstanding and once you have filled in the required note/report/follow up, the case will close automatically and will no longer appear on the schedules list. If a follow up date is set on a note/report, the schedule will not close. Once the follow up has been concluded with no follow up date set, the case will automatically close.
