Comments: The Egyptian goose was swimming in the pond and it was not able to fly out. I tried to go into the pond but the water was too deep i could not manage as the goose was also swimming away. The goose had a place where it can rest on the stone so i had to leave it so that i can bring some ropes tomorrow morning to help me rescue it. On the 27 February 2022 i went again but i found that the bird flew out of the pond. I had to speak to my manager to speak with the Wits management about closing the pond.
