ADEQUATE SHELTER AVAILABLE	Yes	
ANIMALS IN GOOD CONDITION	No ***	Cornish /layers had areas of feather loss from either insufficien
VETERINARY PROBLEMS / HEALTH CO	Yes ***	Cornish / layers has areas of feather loss.

General Report Comments: Upon arrival at the property I met with the owner of the property. He gave me permission to enter the premises. I explained the purpose of my visit. He told me he was doing urban farming and that he has done his research and there was no where it states that he cannot no do what he was doing in a residential area.
I educated him about the municipal bylaws but he wasn't convinced.
I explained to him a number of issues I had with the way the animals were confined: The playmouth rock hens and roosters kept in small plastic containers without provision of food and water. The containers did not provid adequate ventilation and they were overcrowded in the containers.
He said he would cooperate.
I noticed that there was a defeather machine so his other intention was to slaughter and sell meet to the public.
A warning was issued to the owner-see attached

ACTIONS

Warning Issued WG 0442

REPORT OUTCOMES

Follow-up inspection to be conducted 2022-01-24
