General Report Comments: Upon arrival at the property the owner was not present however the gardner gave me permission to enter and see the animals as well as their living conditions.
The dogs were very looked after in terms of their living arrangements but I noticed that the Great Dane was very old, frail, underweight and wobbly.
The gardner informed me that the dogs are frequently taken to a vet by the owner and that the Great Dane gets medication in the morning.
He gave me the contact details of the owner of the dogs but when we contacted him he didn't answer.
