General Report Comments: Upon arrival at the property there were no day old chicks, however there was a large number of chickens and ducks. I noticed that some of the chickens had feather loss and that breeding was encouraged. 5 of the birds had feather concerns. Water was provided was in one space for so many birds meaning that the dominant ones had an advantage to to access to water. There were loose electrical cables that needed to be fixed that would cause unnecessary danger to the birds. There was no swimming pond for the ducks.
A written warning was issued.
