General Report Comments: Upon arrival the dog was confined in a space which is approximately 10m by 4m. The rabbits were kept in a battery cage system, each cage was approximately 1m by 1m and they were 2 rabbits in it. I had to educate the owner that as SPCA we are against caging animals. The animals need to roam freely around the property. She needs to divide her property into so that the dog can stay at the back yard. I had to leave a warning note for the owner to take one of the rabbit with a skin infection to a Veterinary for treatment. The other rabbits appeared to be in good condition.
