General Report Comments: Upon arrival at the property the owner was present. There were two adult dogs, male and female as well as 4 puppies. The adult male dog was limping. According to the owner the dog jumped the wall and broke its nail. She told us that they decided to surrender all the other dogs and keep one puppy. We tried to convince her to surrender all the dogs but she didn't want to. A written warning was issued to the owner advising her that she should have taken the injured dog to the vet even though she decided to surrender it and the others. We also advised her to take the remaining puppy to a vet for its vaccination and deworming.
