General Report Comments: Upon arrival at the complex, I requested to see the complainant with no prior appointment. The complainant was home and I was able to inspect her dogs get her statement. She was unable to recover the equipment used during the incident by the perpetrator (syringe needle) nor did she take any pictures of the incident but there were multiple witnesses who made their own statements including the security's incident report. The dogs were in acceptable physical condition. The dogs had barking collars on to minimize their constant barking. She said that the perpetrator sprayed the substance through the owner's unit door and this was because the dogs were barking constantly. She revealed to me that they will be having a meeting with concerned parties of the complex about the matter at 14:00 later that day. I said to her that I can be in the meeting as well on my official capacity and I will be issuing a warning to the perpetrator. We made arrangements for me to be in the meeting during this discussion. To meet at 14:00
