CLEAN LIVING ENVIRONMENT	No ***	Dirty and shelter was broken down
ANIMALS IN GOOD CONDITION	No ***	No Fly-stike ears
VETERINARY PROBLEMS / HEALTH CO	Yes ***	Fly-stike ears
CONFINEMENT OF ANIMALS	Free roaming - in property	

General Report Comments: At the property, I opened the gate because no one was responding when I was knocking at the gate.. She owns a 4-year-old, tan and white, (intact) male, X-breed named "T. J"which was fairly conditioned but had Fly-stike ears that I was able to see from the gate. I entered the yard as it not locked and knocked at the door. The owner opened the door saying she was in a shower. I asked her why the dog was not provided with shelter in this inclement weather "the kennel broke down a few weeks ago" she responded. I also asked her why the dog not taken to the vet for the fly-bitten ears she said they did not have money for treatment. I persuaded her to surrender the dog to the Sandton SPCA and she agreed to do after phoning her husband. The dog was signed over to the Sandton SPCA but she was issued with written warning for future purposes.

ACTIONS

Warning Issued VX 0648

REPORT OUTCOMES

Animal(s) signed over Y2/314
Case finalised - NFA
