General Report Comments: Upon arrival at the owner's squatter (RV), he told me that his dog had been sick with an injured shoulder and he had taken him to the Bryanston Avian, Exotic and Small Animal Clinic - follow up check on the 24/02/2023. He said that the dog is still on treatment and I asked for the medication which he showed me. Apollo appeared to be recovering very well because I insisted to walk him myself to see how he was doing. In his RV (Recreational Vehicle) there was water, food and bedding for both the owner and the dog. I advised him to put the dog on a stricter diet for weight loss because the dog appeared to be slightly overweight. He said that the dog was on Hills™:Mobility Weight range. He said that he didn't drag the dog but may have been firm in his pulling of the dog when crossing the Main Road with oncoming traffic because Apollo tends to stop in the middle of the road. We will be checking on the dog when in the area. Case closed for now.
