General Report Comments: Upon arrival the owner and the neighbours told me that the complainant's dog is the one which into their property and his dogs attacked the dog. The only concern which I found was that the dogs were chained with a chain which is approximately 1,5metres long. The reason is because when they see another dog coming they jump the gate and fight the dog. I had to educate them regarding sterilising their dog because the female is on heat and the males come because of that. The owner refused sterilisation.
